ABSTRACTED-PUB-NO: DD 261829A

BASIC-ABSTRACT:

A steel measuring tape or ruler is covered with a  
metal-coated polyester foil  
which is very thin in relation to the steel substrate.

Pref. the metal coating is aluminium, titanium nitride or a  
chromium-nickel  
alloy applied to one side of the foil.

ADVANTAGE - The coated foil provides increased corrosion  
resistance, good wear

resistance and high optical quality without deleteriously  
affecting mechanical  
and physical properties of the substrate.

CHOSEN-DRAWING: Dwg.1/1
